# Adhigam-2015 seminar organized by Next Education

**Next Education India Pvt Ltd**, a pioneer in K-12 education, held Adhigam-2015, a residential conference focusing on 'Experimental Learning' at Hotel Inder Residency. The program held from 9th Jan to 11th Jan was addressed by Dheeraj Mehrotra and Sapna Agrawal, educationists from the company.

Sameer Bora, EVP (R&D of Next Education) said that they intend to incorporate hands-on learning into education and help students to go beyond the traditional classroom rules. Many such events will be incorporated to enable students build their life through contemporary educational learning techniques

The NextLab philosophy helps students explore their mental faculties, interpersonal skills and creative aptitude through strategically-creative activities, he added.

The event that was attended by principals and teachers from various schools of Rajasthan and Gujarat witnessed the discussion of how technology should not be feared, rather utilized in an effective way to serve its rightful purpose in the field of education.

In Udaipur, around 30+ schools, both private and government have adopted the concept of virtual learning environment in subjects such as Mathematics, Science, Robotics and English through Next Education.

Next Education, based in Hyderabad has created innovative products that are used in over 6000 schools across the country. The products are mapped to cover the syllabus of CBSE, ICSE and 23 state boards in 8 major Indian languages.
